

from the **ESG DESK**

Dear Colleagues,

Climate change is one of the most talked about topics in the world today! Cyclones, heatwaves, hurricanes, floods, air pollution, disease - everything diminishes the ability to survive, grow and thrive.

Especially for children!

Children are the least responsible for climate change, yet they will bear the greatest burden of its impact. A global generation of children will grow up in a world made far more dangerous and uncertain because of changing climate and degraded environment. This generation must be not just made aware of climate change but also be encouraged to participate in various initiatives as agents of change.

It is to lay foundation to such an initiative that Tanla Platforms has conceived “Green Baton” - a unique volunteering opportunity for our employees to interact with high school students from a wide array of schools - vernacular medium government schools to English medium

private schools with international syllabus. Our volunteers will not only create an awareness and ignite the spark in the students to be agents of change but will also walk along with the students & schools in their chosen area of sustainable action.

Do you want to be the voice which ignites the spark!?

Write in your interest to esg@tanla.com and we will be in touch with you soon.

Regards,
ESG Desk
